The Challenge

A leading **eyewear brand in Romania** wanted to launch a **multi-vendor eCommerce platform** where vendors could:

- Sell products from a centralized inventory while setting their own pricing.
- Manage orders, earnings, and reports through a vendor dashboard.
- Ensure smooth location-based pricing & shipping options.
- Automate vendor payouts and commissions.
- Scale efficiently without manual management overhead.

The client needed a **feature-rich multi-vendor WooCommerce (https://codetrappers.com/wordpress-for-ecommerce/) marketplace** with a **shared inventory model, vendor flexibility, and automated financial processes**.

The Solution

We built a **custom WooCommerce-based multi-vendor marketplace** with advanced functionalities:

Centralized Inventory with Vendor-Specific Pricing

- Vendors could choose products from a shared inventory and list them in their store.
- Allowed custom pricing & offers per vendor, based on location & strategy.

Full Multi-Vendor Capabilities & Dashboard

- Created individual vendor dashboards with real-time sales tracking, inventory

insights & analytics.

- Integrated commission models, automated revenue split & payout scheduling.

Automated Payouts & Earnings Management

- Implemented automated vendor commission calculations & payouts via Stripe & PayPal.
- Allowed scheduled or instant withdrawal options for vendors.

Advanced Order & Shipping Management

- Integrated location-based pricing & shipping rates to optimize delivery costs.
- Enabled real-time shipping tracking for customers & vendors.

Scalability & Growth Features

- Built-in SEO optimization, mobile responsiveness, and scalability for growing vendor participation.
- Enabled multi-language & currency support for future expansion.

The Results

3x Vendor Growth, 50% Faster Order Processing, Fully Automated Payouts & Reporting

3x Vendor Growth

More sellers joined the marketplace due to the ease of onboarding.

50% Faster Order Processing

Centralized inventory reduced vendor fulfillment delays.

Seamless Vendor Earnings & Automated Payouts

No manual calculations needed.

Optimized Shipping & Delivery

Location-based pricing improved order fulfillment efficiency.

Higher Conversions & Customer Satisfaction

Vendors could offer personalized pricing & promotions.

Conclusion

By building a **fully customized multi-vendor WooCommerce platform**, we enabled the **eyewear brand to scale efficiently** with a **centralized inventory, flexible vendor pricing, and automated financial workflows**. The result was a **seamless, profitable, and scalable marketplace** that empowered vendors while keeping operations streamlined.
