1. **Content Management in WordPress** – Admins create and manage content using the familiar WordPress dashboard.
2. **Data Served via API** – Content is retrieved using **REST API (https://codetrappers.com/api-integration-automation/) or GraphQL (WPGraphQL)**.
3. **Front-End Powered by JavaScript Frameworks** – The website is built using **Next.js, Nuxt.js, Gatsby, or Vue.js**.
4. **Global Content Delivery via CDN** – Static files are cached on **Cloudflare, Vercel, or Netlify** for **ultra-fast loading**.
