AI that plugs into the systems you already run

Custom MCP servers, retrieval-augmented search over your own content, and a fixed-price readiness audit. Built against your data, with permissions and an audit trail.

Agents, retrieval and automation built against your own data, with permissions and an audit trail rather than a demo. We run this architecture on our own production site, which is where every guardrail on these pages came from.

Start here

Not sure which one you need?

Send us the URL and tell us what is going wrong. We will look at it properly and come back with what we would do, and what it would cost.

Get in touch (https://codetrappers.com/contact/) Book a consultation (https://cal.com/yusuf-mudagal-6abk5h/30min)

The audit is free and there is no sales call attached to it.

- A free audit first

We'll look at your site and tell you straight what needs doing.

- Fixed scope, fixed price

Agreed in writing before any work starts. No hidden fees.

- A real engineer on the call

You talk to the people who do the work, not a sales script.
