Courses, cohorts and certification

Learning platforms on WordPress: courses, cohorts, assessment and certification, with reporting that answers an administrator’s questions.

Learning platforms on WordPress with assessment and reporting that answers an administrator’s questions, not just a learner’s.

What you get

Inside Custom LMS Solutions

Get in touch (https://codetrappers.com/contact/)

Fully Customizable Learning Experience

We design and develop interactive course structures, quizzes, progress tracking, and gamification features, creating engaging e-learning experiences.

Seamless Integration with Payment & Membership Systems

Monetize your courses effortlessly with WooCommerce, Stripe, PayPal, and membership plugins, enabling one-time purchases, subscriptions, and tiered pricing models.

Automated Student Enrollment & Progress Tracking

Manage students efficiently with automated enrollments, drip-fed content, certification issuance, and detailed analytics for course completion tracking.

Mobile-Friendly & Scalable Learning Platform

We build fully responsive LMS platforms optimized for mobile learning, ensuring students can access content anytime, anywhere, on any device.

Secure & High-Performance LMS Architecture

We implement data encryption, role-based access, and performance optimization, ensuring a secure, fast-loading, and reliable e-learning experience.

The service

Why Custom LMS Solutions Are Essential for Online Learning

Course Management & Structured Learning Paths

Create multi-level courses, organize modules, and offer interactive quizzes, ensuring students get a structured and engaging learning journey.

Advanced Student Engagement & Gamification

Boost retention rates with badges, leaderboards, certificates, and achievement tracking, making learning fun and rewarding.

Multi-Instructor & Membership Support

Allow multiple instructors to upload, manage, and track their courses, enabling a multi-teacher e-learning ecosystem with membership features.

AI-Driven Learning Recommendations

Use AI-powered content suggestions to provide personalized learning paths, helping students find relevant courses and lessons.

Seamless Video & Live Webinar Integration

Embed video lessons, integrate Zoom, Google Meet, and Webinars, and provide live training sessions to enhance real-time learning.

Enterprise LMS Solutions for Corporate Training

We develop custom corporate LMS platforms with employee training, assessment tracking, and compliance reporting for business learning needs.

Why CodeTrappers

Smarter Learning, Scalable LMS Teach, Engage & Grow!

LMS Solutions for WordPress: Interactive, Scalable & Built for Success

Questions

What people ask before they start

Something not covered here? Ask us directly and an engineer will answer.

Ask a question (https://codetrappers.com/contact/)

Whichever fits the teaching model, and we will say when none of them do. Cohorts, assessment rules, certification and reporting are where the platforms differ, and choosing on price or popularity is how a course platform ends up fighting its own plugin two years later.

Yes, through a video host rather than serving files from WordPress, with live sessions integrated from the tool you already use. Hosting video on your own server is the most common and most expensive early mistake.

Progress, completion, assessment results and where learners stall, per cohort as well as per learner. The last is the useful one: it tells you which lesson needs rewriting rather than which student is struggling.

- A free audit first

We'll look at your site and tell you straight what needs doing.

- Fixed scope, fixed price

Agreed in writing before any work starts. No hidden fees.

- A real engineer on the call

You talk to the people who do the work, not a sales script.
