Built for your workflow, not a marketplace

Custom WordPress plugins written to coding standards, with tests and no lock-in. You own the code, and it survives the next core update.

Plugins written to WordPress coding standards with tests, so they keep working after the next core release and you own the code.

Tailor-Made Solutions for Your Business

We develop custom WordPress plugins designed specifically to meet your business needs, whether it’s advanced automation, custom workflows, or enhanced functionality.

Lightweight, Fast & Optimized for Performance

Unlike bulky third-party plugins, our custom solutions are efficient, lightweight, and optimized for speed, ensuring seamless performance without slowing down your site.

Secure & Reliable Code

Security is a priority! We follow WordPress coding standards, implement data protection measures, and regularly test for vulnerabilities to keep your plugin secure and reliable.

Seamless Integration with WordPress & Third-Party Tools

Need API connections, CRM integrations, or WooCommerce enhancements? We build custom plugins that integrate smoothly with your website and external platforms.

Ongoing Support & Scalability

Our plugins are built to grow with your business. We offer regular updates, compatibility checks, and feature enhancements to ensure long-term stability.

The service

Custom Plugins for WordPress – Unlock New

Features & Enhance Your Website

Built for Your Unique Needs

Why rely on bloated plugins with features you don’t need? We create custom plugins designed specifically for your business, ensuring efficiency, speed, and seamless functionality.

Faster & More Lightweight than Generic Plugins

Many third-party plugins slow down websites. Our custom-built plugins are optimized for speed, ensuring your site runs fast and smoothly without unnecessary code.

Fully Secure & WordPress-Compliant

Security is a priority! We follow WordPress coding standards, sanitize inputs, and protect against vulnerabilities, ensuring your plugin remains safe from threats.

Seamless API & Third-Party Integrations

Need to connect with CRMs, payment gateways, or other tools? Our custom plugins integrate effortlessly with WordPress and external applications to streamline your business.

Scalable & Future-Proof Development

As your business grows, so should your tools. We build scalable plugins that can be expanded with new features and functionalities as your needs evolve.

Ongoing Support & Maintenance

We don’t just build and leave! Our dedicated support team provides regular updates, bug fixes, and feature enhancements, ensuring your plugin stays compatible and up to date.

Why CodeTrappers

Custom Plugins, Unlimited Possibilities Tailor-Made for Your WordPress Success!

Custom plugin development for WordPress: secure, scalable, built for performance

At CodeTrappers, we create custom WordPress plugins that are lightweight, secure, and perfectly tailored to your business needs. Whether you need advanced automation, API integrations, or custom features, our expert developers build high-performance solutions that enhance your website without slowing it down. Get Started Now

Expert Developers Who Know WordPress Inside Out

With years of experience in WordPress plugin development, we ensure clean, optimized code that follows WordPress best practices for security and performance.

Fully Customizable & Business-Focused

We don’t believe in one-size-fits-all. Our plugins are designed specifically for your business needs, ensuring maximum efficiency and seamless integration.

Secure & Optimized for Performance

We build fast, lightweight, and security-hardened plugins that enhance your site without affecting speed or stability.

Ongoing Support & Future Scalability

Our plugins evolve with your business! We provide updates, bug fixes, and feature enhancements to keep your plugin running smoothly and efficiently.

Questions

What people ask before they start

Something not covered here? Ask us directly and an engineer will answer.

Ask a question (https://codetrappers.com/contact/)

Usually you should use the existing one. Building is right when nothing on the repository does the job, when the closest option is abandoned or bloated, or when the behaviour is specific enough to your business that no plugin will ever fit it. We will tell you which of those applies before quoting.

You own it, it lives in your repository, and it is written to WordPress coding standards with tests so somebody else can pick it up. No licence key, no phoning home, nothing that stops working if you stop working with us.

That is the point of building against documented APIs rather than editing other people's code. We test against WordPress release candidates, and where core changes something that affects it we fix it rather than you finding out from a white screen.

Start here

Ready to get started with Custom Plugin Development?

Tell us what you need. We'll come back with a plan and a fixed price, usually within a day.

Get in touch (https://codetrappers.com/contact/) Book a consultation (https://cal.com/yusuf-mudagal-6abk5h/30min)

- A free audit first

We'll look at your site and tell you straight what needs doing.

- Fixed scope, fixed price

Agreed in writing before any work starts. No hidden fees.

- A real engineer on the call

You talk to the people who do the work, not a sales script.
