WordPress that survives an audit

WordPress for organisations with governance, SLAs and audit requirements: multi-environment deploys, access control, and response times in the contract.

Multi-environment deploys, access control and response times written into the contract rather than promised on a call.

High-Performance, Scalable Architecture

Enterprise websites handle high traffic and complex workflows. We build scalable WordPress solutions optimized for speed, efficiency, and seamless performance under heavy loads.

Advanced Security & Compliance

Security is critical for enterprises. We implement firewalls, DDoS protection, malware scanning, and compliance measures (GDPR, HIPAA) to safeguard data and prevent cyber threats.

Custom Integrations & API Connectivity

Enterprises rely on multiple platforms. We seamlessly integrate CRMs, ERPs, marketing tools, and custom APIs, ensuring a connected and automated digital ecosystem.

Multi-Site & Multi-Language Capabilities

For global businesses, we provide multi-site networks, multi-language support, and geo-targeted content to enhance user experience across regions.

Dedicated Support & Ongoing Optimization

Enterprises need round-the-clock support. We offer 24/7 monitoring, regular performance audits, and proactive maintenance to ensure stability and continuous growth.

The service

Enterprise solutions on WordPress: scalable, secure, built for growth

Scalable Infrastructure for High Traffic

Enterprise websites handle millions of visitors, our WordPress solutions are built to scale effortlessly, ensuring fast load times and zero downtime even during peak traffic.

Advanced Security & Compliance

Security is a top priority for enterprises. We implement firewalls, malware protection, DDoS mitigation, and compliance measures (GDPR, HIPAA, SOC 2) to protect sensitive data.

Custom API & System Integrations

Enterprises use multiple tools, our WordPress solutions integrate with CRMs, ERPs, payment gateways, and marketing automation platforms, ensuring seamless workflow automation.

Multi-Site & Multi-Language Capabilities

For businesses operating in multiple locations, we provide multi-site WordPress networks and multilingual support, enabling consistent branding and localization for global audiences.

Performance Optimization & Caching

Speed is essential. We implement CDNs, caching strategies, and database optimizations to ensure blazing-fast load times and optimal site performance.

24/7 Enterprise-Level Support & Maintenance

Enterprise websites require proactive monitoring and quick response times. We offer 24/7 support, real-time monitoring, and ongoing updates to ensure continuous uptime and security.

Why CodeTrappers

Enterprise Development for WordPress: Built for Scale, Speed and Security

Enterprise solutions on WordPress: scalable, secure, performance-driven

At CodeTrappers, we specialize in enterprise-grade WordPress solutions designed for high-traffic websites, complex workflows, and global scalability. Our expertise ensures robust security, seamless integrations, and high-speed performance, making WordPress a powerful platform for your business growth. Get Started Now

Proven Experience with WordPress at Enterprise Scale

With years of experience in enterprise-scale WordPress development, we have

successfully built high-performing, secure, and scalable solutions for global brands and organizations.

Enterprise-Level Security & Compliance

We implement firewalls, malware protection, DDoS prevention, and data encryption, ensuring compliance with GDPR, HIPAA, and other industry standards to protect your critical business data.

Custom Integrations & Scalable Architecture

We seamlessly integrate CRM, ERP, API connections, and cloud services, allowing your WordPress ecosystem to function smoothly with existing enterprise tools.

Dedicated 24/7 Support & Proactive Maintenance

We provide real-time monitoring, automated backups, and 24/7 priority support, ensuring your enterprise WordPress site remains secure, updated, and running at peak performance.

Questions

What people ask before they start

Something not covered here? Ask us directly and an engineer will answer.

Ask a question (https://codetrappers.com/contact/)

For content and commerce, yes, and the constraint is rarely WordPress itself. It is usually a plugin nobody audited, a deploy process that runs through FTP, and no staging environment. Fix those three and the platform stops being the risk.

A response time, in writing, with the escalation path named and a person at the end of it. Ours is triage within the hour for emergencies, any hour. An SLA that promises uptime without saying who answers at 2am is a marketing line.

Multi-environment deploys, with changes moving forward through staging rather than being edited live, role-based access so people have what their job needs, and a record of who changed what. Procurement asks for all three, and they are painful to retrofit.

Start here

Ready to get started with Enterprise Development for WordPress?

Tell us what you need. We'll come back with a plan and a fixed price, usually within a day.

Get in touch (https://codetrappers.com/contact/) Book a consultation (https://cal.com/yusuf-mudagal-6abk5h/30min)

- A free audit first

We'll look at your site and tell you straight what needs doing.

- Fixed scope, fixed price

Agreed in writing before any work starts. No hidden fees.

- A real engineer on the call

You talk to the people who do the work, not a sales script.
