Where we come in

# Projects reach us in two states

Either the site is moving to WordPress from somewhere else, or it is already on WordPress and something needs putting right. We are set up for both.

## Move from any platform

Shopify, Webflow, Wix, Drupal, Ghost or a pile of hand-written HTML. We carry over the content, the design and the functionality, and keep the old URLs pointing where they should.

See how migrations work (https://codetrappers.com/migration-for-wordpress/)

Shopify (https://codetrappers.com/shopify-to-woocommerce/) Wix (https://codetrappers.com/wix-to-wordpress/) Webflow (https://codetrappers.com/webflow-to-wordpress/) Drupal (https://codetrappers.com/drupal-to-wordpress/) Ghost (https://codetrappers.com/ghost-to-wordpress/)

Magento (https://codetrappers.com/magento-to-woocommerce/) BigCommerce (https://codetrappers.com/bigcommerce-to-woocommerce/) Squarespace (https://codetrappers.com/squarespace-to-wordpress/) Joomla (https://codetrappers.com/joomla-to-wordpress/) Static HTML (https://codetrappers.com/static-html-to-wordpress/)

## Or fix the site you have

Slow, hacked, broken or simply tired. Most of our work starts on a site that already exists and cannot be taken offline while we work on it.

See everything we handle (https://codetrappers.com/services/)

Emergency Fix (https://codetrappers.com/emergency-fix/) Malware Removal (https://codetrappers.com/malware-removal-for-wordpress/) Monthly Retainer (https://codetrappers.com/monthly-retainer-for-wordpress/)

Page Speed Optimization (https://codetrappers.com/page-speed-optimization-for-

wordpress/) Custom Plugin Development (https://codetrappers.com/custom-plugin-development/) Facelift (https://codetrappers.com/facelift-for-wordpress/)

WooCommerce Maintenance (https://codetrappers.com/woocommerce-maintenance/) Maintenance (https://codetrappers.com/maintenance-for-wordpress/) Mobile Apps (https://codetrappers.com/mobile-app-development/)

Web Apps on WordPress (https://codetrappers.com/wordpress-for-web-apps/) WooCommerce Stores (https://codetrappers.com/wordpress-for-ecommerce/) Sites for Business (https://codetrappers.com/wordpress-for-business/)

A WordPress site is never finished. Plugins update overnight, traffic arrives before you are ready, and something breaks on a Sunday. The question was never whether it happens. It is who picks up when it does.

How we build

## Scattered parts become a site. We make them hold together.

Plugins, themes, hosting, analytics and a dozen integrations, each pulling its own way. We take the pieces you already have and engineer them into one WordPress platform that is fast, secure and easy to run.

Services

## Expert services for WordPress: performance, security and growth

From custom development and WooCommerce optimization to security, speed enhancements and API integrations, end-to-end solutions that keep your site running smoothly.

[### Development

Custom WordPress solutions tailored to your business. Dynamic, scalable, feature-rich sites that drive growth and engagement.](https://codetrappers.com/development-for-wordpress/)[### Maintenance

Stay worry-free. We handle updates, backups and troubleshooting so your site keeps running smoothly, day and night.](https://codetrappers.com/maintenance-for-wordpress/)[### Security

Advanced hardening that safeguards your data, closes vulnerabilities and keeps your site resilient against threats.](https://codetrappers.com/malware-removal-for-wordpress/)[### Website Performance

Optimize for speed, reliability and experience. Faster load times, greener Core Web Vitals, better rankings.](https://codetrappers.com/page-speed-optimization-for-wordpress/)[### Migration

Move to WordPress with zero downtime. We preserve your data, design and

functionality through every step.](https://codetrappers.com/migration-for-wordpress/)
[### Integration and automation

Connect your CRM, ERP, payments and internal tools so data moves on its own. n8n, Make or custom code, with or without WordPress.](https://codetrappers.com/api-integration-automation/)

Case studies

# Proof, not promises

See how we have improved WordPress performance, security and scalability for teams whose revenue depends on it.

All case studies (https://codetrappers.com/case-studies/)

[Web Development

## White-Label Development and Maintenance for a Leading Romanian Agency

A Romanian agency needed WordPress builds it could resell under its own name. We became their delivery team: 1,500 sites built, 800 still maintained.

1500+

Websites Delivered](https://codetrappers.com/case-study/white-label-wordpress-development-maintenance-for-a-leading-romanian-agency/)[eCommerce

## Custom Multi-Vendor WooCommerce Platform for an Eyewear Brand

An eyewear brand wanted to sell through independent opticians. We built the multi-vendor marketplace, the shared inventory and the payout automation behind it.

3x

Vendor Growth](https://codetrappers.com/case-study/custom-multi-vendor-woocommerce-platform-for-an-eyewear-brand/)[eCommerce

## Centralized Inventory Management for Multi-Store WooCommerce Ecosystem

Fifteen WooCommerce stores across Europe kept overselling stock they had already shipped. One inventory source now syncs all of them in real time.

99.9%

Real-Time Inventory Accuracy](https://codetrappers.com/case-study/centralized-inventory-management-for-multi-store-woocommerce-ecosystem/)

Two ways in

# One team, wired for humans and agents

Everything a business expects from a WordPress partner, plus the hooks an AI agent needs to work on the same site. The same engineers behind both.

Whoever is building, at the keyboard or over the API, gets **the same team**.

AI Studio

# Three specialists, on your stack

Each one is scoped to a job, wired into the WordPress and WooCommerce you already run, and answerable for what it did.

The Agent Builder Live

## Agents that do the work, not just describe it

Custom AI agents wired into WordPress and WooCommerce with real permissions, real guardrails and a human in the loop where it matters. Built on your data, deployed on your infrastructure.

- Tool use
- Approval flows
- Audit trail

Custom AI agents (https://codetrappers.com/custom-ai-agent-development/)

The Connector Live

## One protocol between your site and every model

MCP servers that expose exactly the abilities you choose, so Claude, ChatGPT and your own agents can manage content, orders and workflows through a surface you control and can revoke.

- Abilities API
- Scoped access
- Any client

MCP server development (https://codetrappers.com/custom-mcp-server-development/)

The Watchtower Live

## Know what your AI did, and what it cost

Tracing, evaluation and cost monitoring for every agent and model call, with alerts before a regression reaches a customer and a monthly reconciliation you can hand to finance.

- Traces
- Evals
- Cost per run

- Alerts

AI monitoring (https://codetrappers.com/ai-monitoring-observability/)

See all AI services (https://codetrappers.com/ai-studio/)

Solutions

# Powerful and scalable WordPress solutions

Scalable, secure and high-performance WordPress tailored for business, enterprise WordPress, headless architecture, WooCommerce or custom integrations. We've got you covered.

Expertise

## Expertise

- Enterprise Development for WordPress Governance, SLAs and scale (https://codetrappers.com/enterprise-development-for-wordpress/)
- Development for Headless WordPress Next.js front-end, WP as the CMS (https://codetrappers.com/development-for-headless-wordpress/)
- Next.js Front-End React front-ends on any CMS or API (https://codetrappers.com/nextjs-development/)
- Development for WordPress Multisite Many brands, one control plane (https://codetrappers.com/development-for-wordpress-multisite/)
- Serverless Hosting for WordPress Edge delivery, elastic cost (https://codetrappers.com/serverless-hosting-for-wordpress/)

Commerce

## Sell through WordPress

- Workflows for WooCommerce Orders, fulfilment and ERP sync (https://codetrappers.com/woocommerce-workflows/)
- Marketplace Solutions Multi-vendor, payouts and reviews (https://codetrappers.com/marketplace-solutions/)
- Sales Funnels Landing pages that convert (https://codetrappers.com/sales-funnels/)
- White-Label Development for WordPress Your brand, our engineering bench (https://codetrappers.com/white-label-development-for-wordpress/)

Platforms

## Build software on WordPress

- SaaS Platform Development Subscriptions, tenancy and billing (https://codetrappers.com/saas-platform-development/)
- Custom LMS Solutions Courses, cohorts and certification (https://codetrappers.com/custom-lms-solutions/)
- AI-Powered Personalization Content that adapts per visitor (https://codetrappers.com/ai-powered-personalization/)

- Membership & Community Gated content and recurring revenue (https://codetrappers.com/monthly-retainer-for-wordpress/)

Industries

## Work we do a lot of

- Business Websites Sites that bring in leads (https://codetrappers.com/wordpress-for-business/)
- Ecommerce Stores WooCommerce that stays open (https://codetrappers.com/wordpress-for-ecommerce/)
- Web Apps Software built on WordPress (https://codetrappers.com/wordpress-for-web-apps/)

## Tailored to the problem

Every business is different. The architecture follows what you actually need it to do, not a template we already had lying around.

## We handle the technical side

Development, hosting decisions, updates and the 2am pager. You get told what changed and why, not asked to approve it.

## Built to still work in five years

Standard WordPress, documented, without a page builder holding the content hostage. Adding to it later does not mean starting again.

**Not on the list?** If it can be built on WordPress, we have almost certainly built it before. Tell us the problem and we will scope the architecture.

Explore solutions (https://codetrappers.com/solutions/)

Our process

# Eight steps from hello to live

Web solutions designed to meet your unique business challenges, delivering tailored results that align with your vision, with no mystery about what happens next.

1. 01Let's Chat

## Meet & Greet

We start with a friendly chat to learn about your goals and see if we're the right fit.

2. 02Getting the Details

## Scope it Out

Through calls or email we dig into what you need and map out the big-picture plan.

3. 03Ballpark Ideas

## Cost & Timeline

You get a rough idea of costs and timelines up front, so you know what to expect.

4. 04Plan It Out

### Fine-Tune the Details

We work together to nail down specifics and make sure everything is crystal clear.

5. 05All Set?

### Proposal Time

The final game plan with every detail spelled out, ready for your thumbs-up.

6. 06Welcome Aboard

### Onboarding

Once you're in, we handle the paperwork and set things up for a smooth start.

7. 07Let's Build

### Project Kickoff

Meet the team and let's get to work turning your vision into a shipping product.

8. 08Launch & Beyond

### Go Live & Grow

Time to go live, plus we stick around for support and help as your site grows.

In their words

## The kind of partner people keep around

Google

> “I’ve been working with Yusuf for over 7 years, and he’s been a reliable white-label partner for design and development projects throughout that time.”

**Kamran Abdul Aziz** Google review

Google

> “Very happy with the quality of the product and the overall experience. Great design, timely delivery, and excellent support throughout the project. Amazing experience from start to finish.”

**Bharath Akshatha** Google review

AIMamoth

> “I worked with Yusuf and his team for multiple projects and they did a fantastic job with timely delivery, optimized website and custom development. We are going back again to them.”

**Sovon Shaik** AIMamoth

Trustpilot

> “We have been partnered with CodeTrappers since 2019. The best team to trust and get things done right and perfect on WordPress.”

**Manjunath Vishwakarma** Trustpilot

Google

> “They delivered the project on time and maintained excellent communication throughout the process. Their attention to detail and commitment to quality exceeded my expectations.”

**Zaid Shaikh** Google review

Google

> “Their team is professional, responsive, and delivers high-quality solutions on time. They understand business needs and provide effective technology solutions.”

**Faizan Siddiqui** Google review

Why teams trust us

# Low risk from the first call to long after launch

The commitments we make before you sign are the ones we hold ourselves to afterwards, on price, on delivery and on the day something breaks.

## No hidden fees

Fixed, upfront pricing agreed before anything starts, and no surprise invoices afterwards.

- Scope and price agreed in writing before any work starts
- Retainer, fixed-price or hourly, whichever suits the job
- Estimates built from a defined process, not guesswork

## Zero-downtime delivery

Your design matched pixel for pixel, and the site keeps trading while it moves.

- 100% design match guarantee on every migration
- Over 300 sites moved with no data loss
- Staging parity, rollback plan and a launch runbook

## 24/7 monitoring

A team that answers when it matters, not the next working day.

- Issues caught and fixed before your customers notice
- 60-minute triage on emergencies, any day of the year
- Continuous updates, backups and security hardening

What we stand for

# 3 beliefs that guide our studio

Yusuf Mudagal Founder, CodeTrappers

## We believe the launch is the easy part.

Anyone can ship a website. Keeping one fast, patched and online for years is the part that decides whether building it was worth the money.

So maintenance is not an upsell here, it is the work. 98% of our clients stay with us, and when something breaks we have triaged it within the hour.

## We believe WordPress belongs in serious infrastructure.

WordPress runs a large share of the web and is still described as a toy, usually by people who have never had to scale one.

We build on it the way any production system gets built: version control, tests, staging, headless where it earns its place. Global brands run on it because it was engineered to.

## We believe you should give back to what you build on.

Our entire business sits on software somebody else maintains and then gives away for nothing.

We contribute back through Five for the Future, to core, to plugins and to documentation. It keeps the thing we depend on healthy, and it keeps us honest about how it actually works.

FAQ

# Questions we get every week

Still unsure about something? Ask us directly, you'll get a real engineer, not a sales script.

Ask a question (https://codetrappers.com/contact/)

Both. A large share of our work is inheriting sites someone else built, auditing them, stabilising them, and then improving performance and security from there. You do not need to start over to work with us.

You reach us, we triage within the hour, and we work the incident until the site is back. That covers hacked sites, white screens, failed updates, checkout outages and blacklist removal. We then send a written post-mortem with the hardening steps applied.

Yes, it is one of our core solutions. WordPress stays the editorial CMS your team already knows, and we build the front-end in Next.js deployed to the edge. Editors keep the preview and publishing workflow they expect.

A flat monthly retainer scoped to your stack, number of sites, plugin footprint, traffic

and how much hands-on development you want included. No per-ticket billing and no surprise invoices.

We do, and it is a meaningful part of our business. You keep the client relationship and your branding; we act as your engineering bench, with NDAs and your own communication channels.

Our engineering team is in Bangalore, India, and we work in our clients' time zones. Overlap hours are agreed at kickoff so reviews and standups land in your working day.

Writing
