Instant malware removal. Your site clean, secure and back online.

Malware removed, the way in closed, and blacklist delisting handled with Google. Most sites are clean and back online the same day.

Keeping your WordPress site safe from hackers, spam and malicious attacks, and keeping it that way long after the clean-up is done.

Site hacked right now? We triage within the hour, any day of the week. Get help now (https://codetrappers.com/contact/)

- 100% cleanup guarantee
- Triage within the hour
- Blacklist removal & SEO recovery

First response

What happens when you hand us the site

Five things, in this order. You get told what we found, what we removed and what we changed, in writing, not jargon.

Start a clean-up (https://codetrappers.com/contact/)

Immediate Malware Detection & Removal

We scan your entire website to detect and eliminate malware, viruses and hidden threats within minutes, getting your site back to normal ASAP.

Complete Security Hardening

After cleaning your site, we implement firewalls, login protection and advanced security measures to block future attacks and vulnerabilities.

SEO & Blacklist Recovery

If your website is flagged by Google or showing malware warnings, we remove blacklists, restore rankings and get your traffic back.

24/7 Monitoring & Instant Threat Alerts

Our real-time monitoring system constantly checks for suspicious activity, providing instant alerts and fixes before issues become critical.

Secure Backup & Disaster Recovery

We create regular backups of your website so you can instantly restore it in case of

future threats, keeping your data safe and sound.

The service

Restore, secure and protect your website

Removing the malware is the first hour. Everything below is what stops it happening again.

Fast & Complete Malware Cleanup

We quickly scan, detect and remove all malware, viruses and malicious code, restoring your site to a fully functional, secure state.

Protection Against Future Attacks

Removing malware isn't enough. We implement firewalls, security patches and login protection to prevent hackers from coming back.

Google Blacklist Removal & SEO Recovery

If your site is flagged as unsafe by Google, we remove malware warnings, restore your SEO rankings and get your traffic back.

24/7 Security Monitoring & Threat Detection

We continuously monitor your website for suspicious activity, ensuring early detection and instant fixes before problems escalate.

Secure Backups for Disaster Recovery

We set up automated daily backups, so even if something goes wrong, your site can be restored instantly without data loss.

Performance Optimization

Malware can slow down your website. We clean your database, remove harmful scripts and optimize performance for faster loading times.

Hack-free & bulletproof

Your WordPress security starts here

At CodeTrappers we don't just remove malware, we restore your site, fortify security and prevent future attacks. Your WordPress site stays safe, optimized and protected 24/7.

Trusted by Businesses Worldwide

We've successfully cleaned and secured hundreds of WordPress websites, helping businesses regain control, security and peace of mind after an attack.

Advanced Security Hardening

Beyond just malware removal, we implement firewalls, login protection and anti-spam measures to shield your site from future threats.

Instant Threat Detection & Rapid Fixes

Our real-time monitoring system detects suspicious activity and blocks attacks before they harm your website, ensuring uninterrupted security.

100% Cleanup Guarantee

We don't stop at basic fixes. Our deep malware scans remove hidden threats, malicious scripts and backdoors, ensuring complete restoration of your website.

Our process

Eight steps from hello to live

Web solutions designed to meet your unique business challenges, delivering tailored results that align with your vision, with no mystery about what happens next.

1. 01Let's Chat

Meet & Greet

We start with a friendly chat to learn about your goals and see if we're the right fit.

2. 02Getting the Details

Scope it Out

Through calls or email we dig into what you need and map out the big-picture plan.

3. 03Ballpark Ideas

Cost & Timeline

You get a rough idea of costs and timelines up front, so you know what to expect.

4. 04Plan It Out

Fine-Tune the Details

We work together to nail down specifics and make sure everything is crystal clear.

5. 05All Set?

Proposal Time

The final game plan with every detail spelled out, ready for your thumbs-up.

6. 06Welcome Aboard

Onboarding

Once you're in, we handle the paperwork and set things up for a smooth start.

7. 07Let's Build

Project Kickoff

Meet the team and let's get to work turning your vision into a shipping product.

8. 08Launch & Beyond

Go Live & Grow

Time to go live, plus we stick around for support and help as your site grows.

Questions

What people ask when the site is already down

Something not covered here? Ask us directly and an engineer will answer.

Ask a question (https://codetrappers.com/contact/)

We triage within the hour of you reaching us and work the incident until the site is clean and back up. Emergency work does not wait for a proposal.

Cleaning the infection without closing the hole means you get reinfected. We clean, then harden: the outdated component or weak credential that let them in gets fixed, and we tell you plainly what it was.

Cleanup includes getting the blocklisting lifted: removing the malicious code, confirming the site is clean, and submitting for review. Until that clears, the warning costs you more traffic than the hack did.

Start here

Ready to get your site clean and secure?

Get in touch and we'll have you scanned, cleaned and hardened.

Triage within the hour, 24/7, including weekends.

- A free audit first

We'll look at your site and tell you straight what needs doing.

- Fixed scope, fixed price

Agreed in writing before any work starts. No hidden fees.

- A real engineer on the call

You talk to the people who do the work, not a sales script.
