Everything we do to WordPress, and around it

Every service we offer for WordPress in one place: builds, maintenance, malware removal, speed work, migrations and API automation. Fixed scope, fixed price.

Care, building, scaling and moving. Speed, security, analytics and automation work is platform neutral, so it is here for Shopify, Webflow, Laravel and Next.js sites too. Pick the one that matches the problem you have today; most clients start with one and add the rest.

25ways we can help **Fixed price**agreed before work starts **An engineer**on the first call

Start here

Not sure which one you need?

Send us the URL and tell us what is going wrong. We will look at it properly and come back with what we would do, and what it would cost.

Get in touch (https://codetrappers.com/contact/) Book a consultation (https://cal.com/yusuf-mudagal-6abk5h/30min)

The audit is free and there is no sales call attached to it.

- A free audit first

We'll look at your site and tell you straight what needs doing.

- Fixed scope, fixed price

Agreed in writing before any work starts. No hidden fees.

- A real engineer on the call

You talk to the people who do the work, not a sales script.
