WordPress for growing businesses

Fast, secure, editable WordPress sites for growing businesses. Built and maintained by an engineering team in Bangalore, with fixed scope and fixed price.

For most of our clients the website is the first thing a buyer meets and the last thing anyone has time to maintain. We build the site, then keep it fast, patched and working.

43business sites **907,337**monthly visits served **Since 2016**building on WordPress

What usually brings people here

The same four problems, over and over

It loads fine on your laptop

And takes eight seconds on a phone on mobile data, which is how most of your traffic arrives. Page speed is a sales problem before it is a technical one.

Nobody can edit it

The person who built it left, the page builder licence lapsed, and now a copy change needs a developer. We hand back a site your team can actually run.

Updates are somebody else’s job

Until a plugin goes unpatched for a year and the site gets hit. Ownership of updates, backups and monitoring is the whole point of a retainer.

The contact form stopped sending

Quietly, months ago, and no one noticed because nothing errors. We test the paths that make you money, not just the ones that render.

What we do about it

The work this usually turns into

[### Development for WordPress

See what it covers](https://codetrappers.com/development-for-wordpress/)[### Page speed optimization

Questions

What people ask before they start

Something not covered here? Ask us directly and an engineer will answer.

Ask a question (https://codetrappers.com/contact/)

43, all listed in our public showcase with the stack and traffic for each. Between them they serve about 907,337 visits a month. We have been building on WordPress since

2016.

And takes eight seconds on a phone on mobile data, which is how most of your traffic arrives. Page speed is a sales problem before it is a technical one.

Until a plugin goes unpatched for a year and the site gets hit. Ownership of updates, backups and monitoring is the whole point of a retainer.

No. A large share of our work is inheriting sites someone else built: auditing them, stabilising them, then improving performance and security from there. Starting over is a decision, not a prerequisite.

Fixed scope and fixed price, agreed in writing before anything starts. We look at the site first and come back with what we would do and what it costs. The audit itself is free and carries no sales call.

Start here

Tell us which of the 4 problems is yours

Send us the URL. We will look at it properly and come back with what we would actually do, and what it would cost.

Get in touch (https://codetrappers.com/contact/) Book a consultation (https://cal.com/yusuf-mudagal-6abk5h/30min)

- A free audit first

We'll look at your site and tell you straight what needs doing.

- Fixed scope, fixed price

Agreed in writing before any work starts. No hidden fees.

- A real engineer on the call

You talk to the people who do the work, not a sales script.
