WordPress as a SaaS – Building Scalable, Subscription-Based Website Platforms

Abstract

Traditional WordPress sites operate as standalone installations, limiting their ability to scale for **multi-user, multi-site, and recurring revenue models**. However, with the rise of **Software-as-a-Service (SaaS) models**, WordPress can be transformed into a **scalable, multi-tenant SaaS platform (https://codetrappers.com/saas-platform-development/)**, allowing businesses to offer **subscription-based website creation services, membership solutions, and digital product platforms**. This white paper explores the **architecture, benefits, challenges, and best practices for implementing WordPress as a SaaS solution**, enabling businesses to monetize their expertise while providing fully managed web solutions.
